

# MID AMERICA METER

Water Meter Sales, Testing, & Service

## Your Trusted Meter Partner

Mid America Meter has delivered trusted water and flow meter solutions for more than 40 years. From meter sales and service to accuracy testing and technical guidance, our experienced team helps utilities, contractors, and property owners keep metering accurate, reliable, and hassle-free.

We also provide proven freeze protection solutions designed to protect residential water meters in cold climates, shallow pits, and manufactured home environments.

## What We Offer

Backed by deep industry knowledge, quality workmanship, fast turnaround times, and consistent testing procedures to save you time and money.

### Commercial Meters

Sales, testing, cleaning, calibration, repair, and rebuild solutions for commercial and industrial water meters.

### Residential Meters

Water meter testing to support client revenue management and sampling programs, billing dispute resolution, and meter changeout projects.

### MeterFleet Managed Solutions

Affordable, turnkey management and maintenance programs for municipal and commercial meter fleets in MN and WI.

### Freeze Protection

Simple, affordable protection for water meters in cold climates, shallow pits, or beneath manufactured homes.

## Who We Serve

No matter your water meter application, get the products, services, and expertise you need to keep operations flowing.

- Municipalities
- Industrial & Commercial Companies
- Distributors & Resellers
- Utility Contractors
- Submeter Companies
- Manufactured Home Park Owners

# MeterFleet Managed Solutions

Remove the operational and administrative burden of managing your commercial water fleet.  
Available in Minnesota & Wisconsin

## Managed Accuracy Assurance Program

Basic-level program management, including scheduling of services and shipping, as well as annual and on-demand accuracy reports.

- Review of meter inventory and program customization
- Annual visit to inspect and field-test electronic and non-removable mechanical meters
- Regular rotation for in-shop testing, cleaning, and calibration of removable meters
- Pick-up and plating and/or return and reinsertion of shop-tested meters (optional)

## Managed Operations Support Program

Comprehensive program management, including all Managed Accuracy Assurance services, plus:

- Complete fleet assessment and documentation of meter specs, manufacturers, history, and maintenance records
- Development of a long-term replacement schedule, complete with timelines, budgets, lay length, plumbing considerations, and guidance for selecting the right replacement options
- Discounts on testing, repairs, and meter purchases through Mid America

## Freeze Protection

Designed for durability, thermal performance, and easy installation, Select Products meter insulators help prevent freeze damage, service interruptions, and costly repairs in residential applications.

### Standard Reflective Foil Jacket

**Maximum Thermal Protection for Harsh Conditions**

- Ideal for cold climates and shallow meter pits
- Reflective interior helps retain ambient heat
- Durable, waterproof outer shell
- Fast installation with secure, gap-free fit

**Best for:** Applications where maximum freeze protection is a priority and heat tape is used.

### Radio Wave Safe Jacket

**Strong Protection Without Signal Interference**

- Enables accurate remote meter readings
- Prevents signal interference from foil lining
- Maintains strong thermal insulation performance
- Same quick-install, universal fit design

**Best for:** Applications where transmitter is built into meter head and encased by jacket.

### Rigid Polystyrene Jacket

**Reliable, Long-Lasting Freeze Protection**

- High-performance foam for reliable thermal protection
- Maintains integrity in damp and underground conditions
- Non-absorbent, moisture- and freeze-resistant
- Durable, low-maintenance construction

**Best for:** Applications where meter readings are performed visually.

Compatible with all 5/8" and 3/4" water meters.

Compatible with Badger M25 (RGDJKT25), Neptune T10 (RGDJKT10), and similar meters.
