

## Meter Freeze Protection

### Reliable Thermal Performance in Harsh Winter Conditions

Designed for durability, thermal performance, and ease of installation, Select Products® meter insulators help utilities, submeter operators, and property owners prevent costly freeze damage, service interruptions, and emergency repairs in residential water meter applications.

### Flexible Universal Jackets

Compatible with all 5/8" and 3/4" water meters

Single-piece design featuring a waterproof shell, dense layers of insulation, and a built-in hook-and-loop fastener, ensuring a snug fit that prevents air gapping for all meter brands—with the ability to be installed in just 30 seconds!

#### Flexible Reflective Foil (FLXJKTRF)

13" x 13" | 10 oz

Amplifies heat tape impact

#### Flexible Radio Wave Safe (FLXJKTRWS)

13" x 13" | 10 oz

Designed for built-in transmitters

### Components

- Waterproof shell
- Dense insulation layers
- Built-in hook-and-loop fastener

### Rigid Polystyrene Jackets

Compatible with Badger M25, Neptune T10, and similar meters.

Lightweight and waterproof, Select Products' original meter insulation solution consists of two halves, held in place by two straps and two hooks to encase the water meter and couplings.

#### Badger M25 (RGDJKTM25) and similar meters

9.25" x 6.5" x 4.75" | 4 oz

#### Neptune T10 (RGDJKTT10) and similar meters

9.25" x 6.3" x 4.75" | 4 oz

### Components

- 2 rigid waterproof halves
- 2 straps
- 2 hooks
