

MeterFleet Managed Solutions

Fleet Management Has Never Been Easier

Remove the operational and administrative burden of managing your commercial or municipal water fleet with a turnkey meter management and accuracy assurance program.

MeterFleet Managed Accuracy Assurance

Basic-level program management, including service and shipping scheduling, and annual and on-demand accuracy reports.

- Review of meter inventory and program customization
- Annual field inspection and testing for electronic and non-removable mechanical meters
- Regular rotation for in-shop testing, cleaning, and calibration of removable meters
- Pick-up and plating and/or return and reinsertion of shop-tested meters (optional)

MeterFleet Managed Operations Support

Comprehensive program management, including all Managed Accuracy Assurance services, plus:

- Complete fleet assessment and documentation of meter specs, manufacturers, history, and maintenance records
- Development of a long-term replacement schedule, complete with timelines, budgets, lay length, plumbing considerations, and guidance for selecting the right replacement options
- Discounts on testing, repairs, and meter purchases through Mid America

Compliant. Accurate. Predictable.

Proactive care is your key to keeping meters operational and compliant with AWWA and state requirements. Trust our MeterFleet experts to identify under-registration before it impacts billing, convert costly emergency repairs into a predictable annual maintenance cost, and help extend the usable life of your meters.
